

8 Reasons:

Why You Need a Website

- 1. Your Competition Has a Website.** If you are in direct competition with another business that has a website, they have a clear advantage.
- 2. You're Open 24/7.** A website will allow your business or organization to be open 24 hours a day, seven days a week. Many people surf the web in the evening when most businesses are closed.
- 3. Deliver Significant Information.** More than ever before, people are turning away from traditional means of finding information and looking online.
- 4. Improve Customer Confidence & Corporate Image.** With a professional website, your business will instill customer confidence and will greatly improve your overall image.
- 5. Small Businesses Have Higher Revenue.** According to the Small Business Administration, small businesses that have websites are averaging \$1.07 million per year in sales more than small businesses not online. That equates to 39% higher revenue.
- 6. 217 Million People.** That's a lot of people. In fact, it is the number of Americans that regularly use the Internet. Of those, 43.7 million use broadband. Worldwide Internet usage is one billion.
- 7. Establish More Customers.** According to the Small Business Administration, 50% of Internet sales are from new customers. Having a website will significantly improve your customer reach no matter what services or products you are offering. Want new customers? Get a website!
- 8. Not Just Local - Global.** Most small businesses are only able to market to their town and surrounding communities. With a website, you can take your goods and services across America and around the world, if you choose.

Domain Name Registration

Domain name is a unique word, or a couple of words, usually associated with an IP address, that represents a special place on the Internet. You need a domain name because it gives a name to your place in the biggest society in the world - the World Wide Web. **Visions Business Services** is an ICANN Certified Domain Registrar.

Hosting

Having a website of your own would be unthinkable without a web hosting account at hand. We offer both individuals and variously sized businesses full-featured packages, loaded with plenty of resources and administration tools for building and maintaining a positive Internet presence. **Visions Business Services** provides high-quality hosting solutions including virtual private servers, dedicated servers, semi-dedicated servers, shared web hosting accounts, domain names and SSL certificates.

Website Design

Visions Business Services can design custom web pages that properly represent you, your company, your organization or blog. VBS creates web spaces that are interactive, dynamic and professional; all with your budget in mind. The internet is growing at an amazing rate and it is mandatory that your business take advantage the opportunities the internet offers. We create websites that are optimized to load quickly, to be found by search engines and, most importantly, provide a great experience for your visitors .

Website Optimization

Website optimization is the process of specifically designing your web pages to rank high in the Search Engines. If you're serious about your business, optimizing your web pages is a must. We configure or reconfigure your websites' content and coding to make it more visible to search engines, which will get more traffic to your website.

Visions Business Services can also be consulted on brand-building on the Internet, social network marketing and alternative traffic-generating techniques”

Website Maintenance

Content Updating, Link Management, Update Graphics, Website Migration, Email Management, Forwarding, New webpage integration, and more.

Why Use

Visions Business Services for your Internet Services?

We focus our online efforts on providing both novices and IT professionals with a complete web product that gives you everything you need to step onto the Internet scene quickly and trouble-free - cost-effective web hosting plans with domains and e-mail features, FREE web design and web content tools, and lots of guarantees for your online success.

The plans we offer are equipped with 1-click installation tool that will allow you to set up your blog, forum, gallery or e-commerce website in seconds. We have built-in redundancy, with servers located in the US and Europe and we guarantee 99.9% uptime, so your website is always up and running!

24/7 SUPPORT

We offer multiple ways for you to get the assistance you need, when you need it . We provide "Context Help" on each page, "Video Tutorials", "Help Center" and our "Ticketing System". Opening a trouble ticket through our "Ticketing System" is very easy. A support team member of Visions Business Services will help you adequately and you will receive the desired information within maximum **one hour** after the ticket has been opened by you.

Why not use GoDaddy.com ?

GoDaddy suspends accounts without due cause.

GoDaddy loses customer domains.

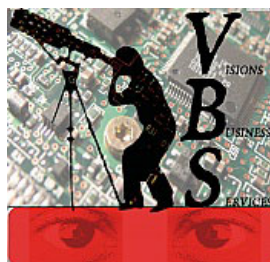

GoDaddy uses dirty tricks to block domain name transfers.. This makes it more difficult to migrate your website to new servers.

GoDaddy is well-known because they spend millions on television advertising campaigns, but they invest very little in improving customer service, which consistently gets low ratings.

At **Visions Business Services**, our customers are first! We have built a solid foundation with our technology so that we can focus on the customer. World-Class customer service, backed up by reliable technology , creates a positive customer experience.

Let us make your visions reality!
